

## NOTICE TO INDUSTRY

### New Construction Meter Install Modification

EFFECTIVE Monday, May 12th, 2025

The Utilities Collections and Distribution Division (UCD) has modified an existing process for requesting Kit A/Meter Installs. Currently a visible permit board is required on site prior to the installation of a potable water meter or irrigation connection. Effective, May 12<sup>th</sup>, 2025, the property must be clearly marked with the house number as determined by e911. Prominently displaying the house number will allow UCD to verify the location before installing a new water meter at the correct location. In addition, the slab needs to be in place. Please ensure that all new and existing requirements have been met prior to scheduling the UTL – Kit A/Meter Install Request. If you have questions regarding the Kit A/Meter Install Request process, please refer to the Notice to Industry effective March 1<sup>st</sup>, 2024.

This new process will ensure timely installation of your requested utility services and avoid additional fees. Should you have any questions, please contact UCD at 239-574-0851 or [ucdinfo@capecoral.gov](mailto:ucdinfo@capecoral.gov).
